## Wiring diagram, example of connection with signal conditioner EMS169

Note: The signal conditioner setting is in the signal conditioner documentation

1. Load compression, signal conditioner output positive (0...+10 V, 4...20 mA)

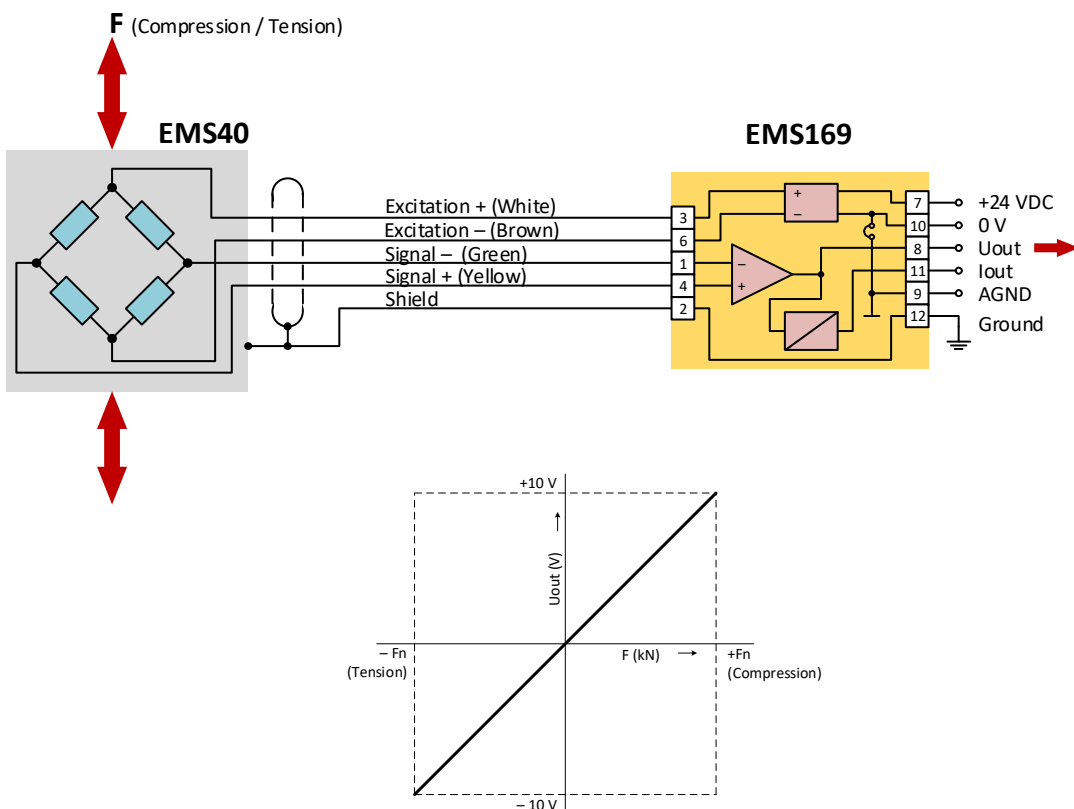

2. Load tension, signal conditioner output positive (0...+10 V, 4...20 mA)

3. Load compression and tension, signal conditioner output bipolar (-10 V ... 0...+10 V)

Note: The current output does not work in the negative range.

4. Load compression and tension, signal conditioner output positive (0...+10 V, 4...20 mA)
